

Grobest Times

September 2006

2nd Edition

This is Grobest Australia's 2nd Newsletter, designed to keep you up to date with the latest news and developments in the Australian aquaculture feed market. 2006 has seen a number of exciting changes to the dynamic of Grobest's feed distribution company. With the change of ownership from Primo Aquaculture to the Bray Investment Group Pty Ltd, Grobest Australia will continue to supply the very best quality Aquatic feed throughout Australia and New Zealand. The Grobest Feed Range prides itself on supplying not only scientifically proven feed formulations, but

proven on farm Grow out results. Australian fish & prawn farmers are now under pressure to deliver the very best quality product as efficiently and economically as possible to remain competitive. Grobest sources the highest grade fish proteins and combines the very best technology to create the best quality fish pellet available.

New Silver/Jade diet now available.

Grobest is proud to announce the introduction of the brand new diet specific Silver and Jade perch feed. Based entirely on marine proteins this diet is designed for rapid growth as fingerlings and a controlled grow out diet to maintain optimum health and end flavour. The absence of animal proteins has been recognized as a good prevention against "winters disease" allowing optimum digestion through the colder months of the year. A reduction in fat content will also prove beneficial in reducing unhealthy fat deposits within the gut cavity.

SE Diet cont...

Figure 1

Figure 2

Figure one shows the belly cavity of a Silver Perch fed on a traditional meat meal based diet,. Notice the organs are completely encased in animal fat concealing the organs from view. Figure 2 shows the belly cavity of a wild caught silver perch that had been feeding on natural fish, plant and crustaceans. Notice the entire organ system is visible with little or no fat deposits within the belly at all. Grobest's SE diet range is designed to be as close to a natural diet as possible. Grobest recommends that you reduce your normal feeding regime by up to 10% due to the high digestibility of the pellet blend.

SE Range Technical Data:

Protein 35%

Fat 10%

Carbohydrate 20%

Moisture 10%

Ash 6%

Vitamin Aqua Mix—Rovimix vitamin delivery system.
